Education

Kauno Kolegija — Lithuania, Kaunas
Bachelor's Degree in Software Systems — *Sep. 2022 — Feb. 2026*

Experience

Freelance Software Developer — Jan. 2026 – Mar. 2026
UAB Lutra / Document Management Application — *Remote*

- Built a cross-platform desktop ledger application using **Tauri**, **Rust**, and **Svelte** to achieve fast execution times and reduce memory footprint by over **70%** compared to traditional web-wrapper alternatives.
- Built end-to-end **CRUD** features for core business entities, utilizing **SQLite** and **Diesel ORM** for type-safe offline data management.
- Implemented an automated PDF generation system for invoices, receipts, and orders using **genpdf**, eliminating manual formatting errors and accelerating the billing process.
- Designed flexible user interface supporting both template-based automation and manual data entry, providing workflow adaptability that improved average document creation speed.

Full-Stack Software Developer Intern — Sep. 2025 -– Nov. 2025
UAB Ainera — *Kaunas, Lithuania*

- Developed and maintained **WordPress** websites using **PHP**, delivering custom features and ongoing client enhancements.
- Built and customized **WordPress** themes and plugins, extending site functionality to meet client-specific requirements.
- Integrated backend services and managed **SQLite** database interactions in **PHP**, ensuring reliable data processing and application performance.

Full-Stack Software Developer Intern — Oct. 2024 — Jan. 2025
MB Timitis — *Kaunas, Lithuania*

- Developed a full-stack IT service order management system using **React (TypeScript)** and **Spring Boot** to centralize order tracking.
- Designed and secured **RESTful APIs** supporting full CRUD functionality, utilizing **Spring Security** and **JWT** for strict role-based access control, protecting data from unauthorized access.
- Modeled and optimized relational database schemas utilizing **Spring Data JPA** and **Hibernate** to guarantee data integrity.
- Automated email notification workflows using Spring Mail to instantly alert clients and technicians of status updates, eliminating the need for manual customer follow-ups.

Projects

Rhythmic | *.NET, React, MySQL, TypeScript* — Feb. 2025 — Oct. 2025

- Developed a full-stack web application for managing and organizing music playlists across multiple platforms using **React (TypeScript)** and **ASP.NET Core (.NET 9 Web API)** for a centralized experience.
- Engineered real-time data streaming using **SignalR** to push synchronization and transfer updates directly to the client interface, ensuring a highly responsive user experience.
- Built a custom playlist versioning system and duplicate track detection algorithm to prevent accidental overwrites and guarantee data consistency across multiple streaming services.
- Designed a relational database schema using **Entity Framework Core** and **MySQL** to efficiently model and query complex music, playlist, and track relationships.

Technical Skills

Languages: Java, C#, MySQL, SQLite, TypeScript, HTML, CSS, Rust
Frameworks: React, Svelte, Node.js, Spring Boot
Other Tools: Git, Docker
